

SURVEYS

TONNAGE MEASUREMENT

Andaman Marine Surveyors (AMS) under the banner of the International Institute of Marine Surveyors (IIMS) & MECAL is approved by the Maritime & Coastguard Agency to undertake Tonnage Surveys on vessels of up to 24 metres length for British Registration.

In addition to British Registration, AMS is also approved to undertake Tonnage Surveys for:

- Jersey
- Guernsey
- Isle of Man
- British Virgin Islands
- Cayman Islands
- Gibraltar
- Other Flag States with prior approval

The calculated tonnage figure bears no relation to the vessel's actual weight but is a volume calculation based on the length times breadth times depth.

The vessel may be in or out of the water whilst the Tonnage Survey is being conducted.
